

Energy Performance contracting

The Om corporation company and the weaving unit agree the energy saving goal of the energy saving project in the form of contract. In order to realize the energy saving goal, Om corporation company provides necessary services to the energy using unit and pays the input of Om corporation company and its reasonable profit for the energy saving service mechanism. Its essence is to reduce energy costs to pay the total cost of energy conservation projects energy business. This type of energy-saving investment allows customers to use future energy-saving benefits for plant and equipment upgrades to reduce operating costs.

Energy Conservation Management Consulting

Energy saving management consulting is run by have rich theoretical knowledge and practical experience of energy saving, in close coordination with the energy-using units executives, the application of science approach to energy-using units of compressed air system energy consumption test, field survey, data analysis, find out the problems of high energy consumption, analysis the reasons of the problems, and put forward the optimal solutions, the implementation of the guidelines to implement, in order to achieve saving and reducing consumption, to achieve enterprise energy saving goal, to promote enterprise reduce running cost of energy consumption.

Energy Conservation Concept

High Efficiency

Increase the loom speed
and work efficiency

High Quality

Improve the fabrics quality

Low Energy Consumption

Reduce the air consumption

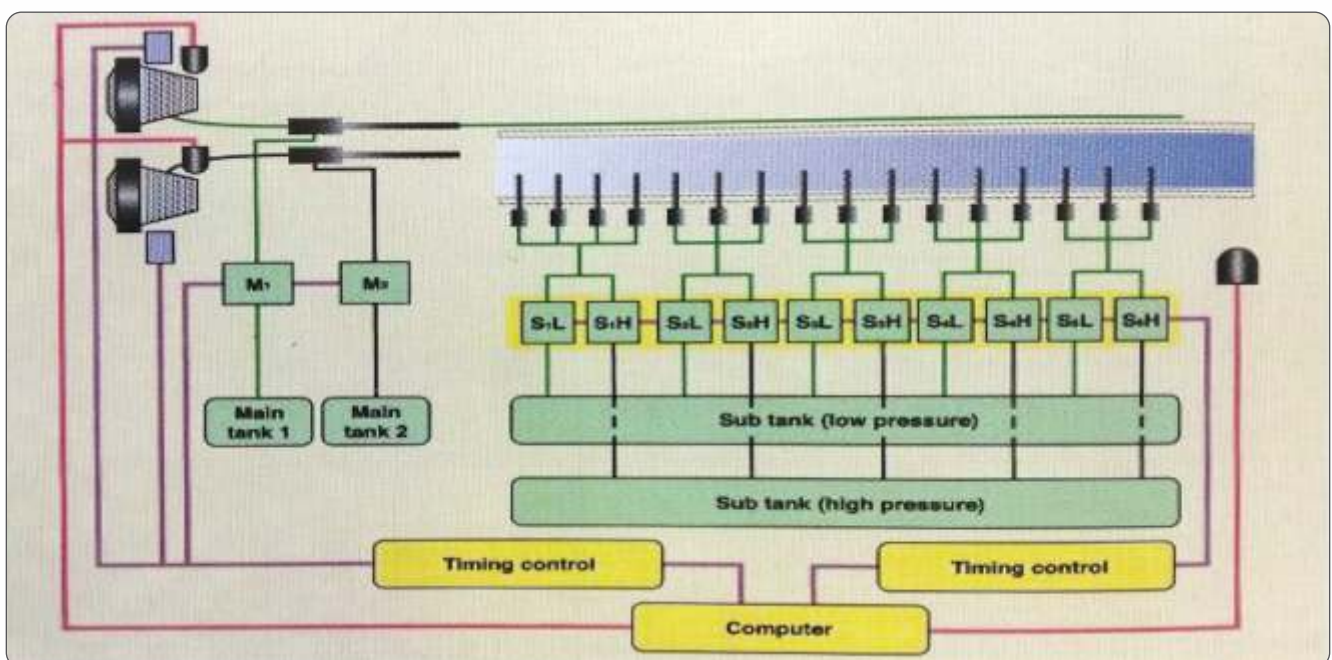

High Returns

Maximizing benefits to weaving mills

“ With each machine, OM Corporation can save 10~25% of air consumption, save 600~1176 USD per year on average for customers, increase output by 10~20%, and input cost return period of 2~6 months”.

Energy Conservation Concept
